

OpenDoors **THE SECRET CIPHER DISC**

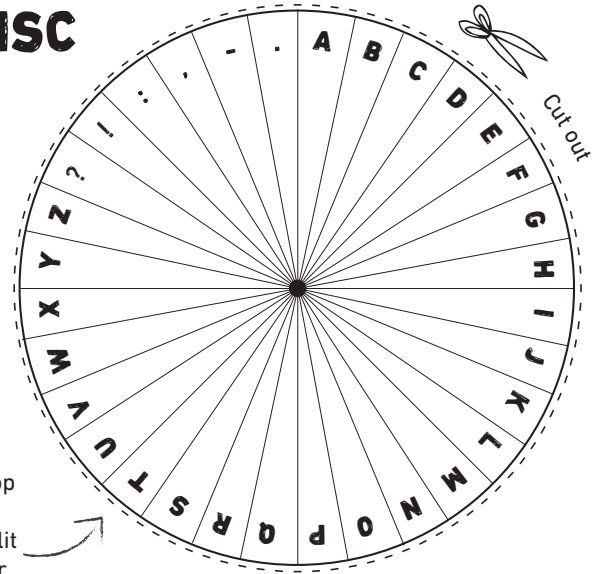

YOU WILL NEED: scissors, a sharp pencil, sticky tack, a split pin, a paperclip

STEP 2. Put sticky tack under the centre of each disc and use a pencil to make a hole in each disc.

STEP 3. Put the small disc on top of the big disc and push a split pin type paper fastener through the holes. (If you don't have a split pin, you can put a drawing pin through and pin the wheel into a piece of wood or cork, or even thick cardboard. As long as you make sure that you can move both discs. Watch your fingers!)

HOW TO USE YOUR CIPHER DISC:

- The 'Crack the Code' entry in your Prayer Passport tells you how to line up your cipher disc. For example, 'A = ✂' means you should turn your discs so the letter 'A' is under the symbol '✂'.

- Once you have lined up A to the right symbol, you can look at each symbol in the message and find the letter that is under it on your disc.

- Work out the letter that each symbol represents in order—it might help to write it down—and you will be able to decipher the secret message.
